Perkins based INDUSTRIAL GAS ENGINES

Cooling system

Recommended coolant: 50% inhibited ethylene glycol or 50% inhibited propylene glycol and 50% clean fresh water. For combined heat and power systems and where there is no likelihood of ambient temperature below 10 °C, then clean 'soft' water may be used, treated with 1% by volume of Perkins inhibitor in the cooling system. The inhibitor is available in 1 litre bottles from Perkins.

Total coolant capacity (engine only) 3.6 litres
Maximum jacket water pressure in crankcase ... 1.5 bar (Dynamic)

Jacket cooling water data	Units	1500 rev/min
Coolant flow	l/m	51
Coolant exit temperature (max)	°C	100
Coolant entry temperature (max)	°C	86

Shutdown switch setting... coolant 112 °C rising
Recommended operating range... 86 / 90 °C

Lubrication system

Recommended lubricating oil: lubricating oil requirements vary with fuel used. Full specifications including oil sampling and recommendations and condemnation limits appear on the fuel, coolant and lubricating oil recommendation sheet for the KvT Series Gas Engines.

Lubricating oil capacity

Sump option GB001
Maximum sump capacity 10,6 litres
Minimum sump capacity 8,6 litres
Maximum engine operating angles

Lubricating oil temperature

Maximum oil temperature..... 105 °C
Oil pump Gear driven
Shutdown switch setting.....oil 1,0 bar normally closed

Exhaust system

Maximum permitted back pressure of the complete exhaust system is 4.0 kPa(40 mBar).

Fuel system

Recommended fuel: Natural Gas LHV at 31.6 MJ/m³. Other fuels may be used, for example landfill or digester gas. Ratings will vary from those shown.

Where fuels other than Natural Gas are being considered it is imperative that a full gas analysis (including details of any solid or liquid components) be obtained. Reference should be made to Kemper en Van Twist Gas B.V. to determine suitability. Gas supplies must be filtered to the same standard as the engine intake air (i.e. Maximum particle size not to exceed 50 microns).

Gas supply pressure 1,5 kPa to 5 kPa at full rated flow
Mixer type Woodward with zero pressure regulator

Installation of gas supply and shut off valves to be in accordance with local regulations.
